

## Training

At Dyscover we are committed to raising awareness of aphasia and promoting the work of our organisation.

Dyscover's specialist staff have a wealth of knowledge about aphasia, its impact on daily life, and the value of long term support in rebuilding communicative effectiveness, confidence and self esteem.

We are skilled trainers and educators, often including and involving people with aphasia in our presentations.

We are happy to design and deliver a presentation to suit the needs of your organisation. Contact us at [info@dyscover.org.uk](mailto:info@dyscover.org.uk) to discuss your requirements.

Recent examples include;

- 30 minute presentation to Tadworth Sea Scouts as part of their 'Communications' badge.
- Full afternoon workshop for year 6 pupils at St Joseph's School Redhill as part of their PSHE sessions.
- Bespoke half day training session to 22 staff at The Grange Bookham, to improve their ability to support one of their residents who has aphasia.
- Full day training in ' Understanding Aphasia' and 'Working with Groups' for volunteers working in stroke support groups.
- Short talk to group of NatWest staff in Sutton
- Collaboration with NHS Community Speech and Language Therapy team in Guildford and Waverley to present part of Stroke awareness course to health and social care staff at Surrey University.
